

## Space for Inspiration

### A Joint Conference with the International Space School Education Trust and the Royal Aeronautical Society

Astronaut Charlie Bolden is making a special visit to the prestigious Royal Aeronautical Society to help celebrate the anniversary of 50 years in space. Charlie is an African American Astronaut Hall of Fame and featured role model on [www.topblacks.com](http://www.topblacks.com). Charlie's visit also coincides with the bicentenary of the abolition of the slave trade in the British empire in 2007. Charlie's grandfather was a slave.

Charlie is a Major General. He overcame social deprivation and prejudice to have had an amazing career including a successful aviator, systems engineer, astronaut, businessman, and entrepreneur.

Charlie is sought after throughout the world as a speaker on leadership, motivation, space, science and overcoming personal difficulties to achieve success and fulfillment. He is able to provide unique and far sighted insights into how to inspire our generation of young people.

The event will be of interest to anyone who is interested in space and education.

Discover how space can be used to excite interest in science, technology, engineering, mathematics, enterprise and history.

Delegates will have an opportunity to find about career opportunities within the aerospace and space industry

**22 January 2007**  
**Royal Aeronautical Society**  
**4 Hamilton Place**  
**London W1J 7BQ**  
**2pm - 5pm**

Please contact Julie Woodcock  
at ISSET for delegate rates  
and booking information
